DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Group I. Claims 1-3, 11-13, and 19-20 are, drawn to a device containing a web conveyor including a drive wheel and a follower wheel, a knock level mechanism, an article detector, a treadle including a web guide plate and a guide strip, and a kinematic linkage, classified in class 226, subclass 163.
 - Group II. Claims 1, 4-9, and 11-12 are, drawn to a device containing a web conveyor including a drive wheel and a follower wheel, a knock level mechanism, an article detector, a treadle including a web guide plate and a guide strip, and guide members, classified in class 226, subclass 91.
 - Group III. Claims 10 and 14-17 are, drawn to a device containing an article detector and a treadle including a web guide plate and a guide strip, classified in class 226, subclass 196.1.
 - Group IV. Claim 18 is, drawn to a device containing a web conveyor including a drive wheel and a follower wheel and a knock lever mechanism, classified in class 226, subclass 154.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions of groups I-II and groups III and IV are related as combination and subcombination. Inventions in this relationship are distinct if there is evidence that the

Art Unit: 3724

combination does not rely on the subcombination for patentability. See MPEP 806.05 (c), example 3. For example, group III is evidence that the combination of groups I-II do not rely on the web conveyor including the drive wheel and the follower wheel and the knock lever mechanism of group IV for patentability, and conversely, group IV is evidence that the combination of groups I-II do not rely on the article detector and the treadle including the web guide plate and the guide strip of group III for patentability.

Claim 10 will be examined if any of groups I-II is elected and claim 18 will be examined if group I is elected.

Claims 1 and 10 link(s) inventions of groups I-II. The restriction requirement of the linked inventions is subject to the nonallowance of the linking claim(s), claims 1 and 10. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Art Unit: 3724

Inventions of groups I-II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. For example, the device of group I does not require the guide members set forth in group II, and conversely, the device of group II does not require the kinematic linkage set forth in group I. See MPEP § 806.05(d).

Inventions III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of group III has separate utility such as a device not requiring the web conveyor including the drive wheel and the follower wheel and the knock lever mechanism set forth in group IV. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen Choi whose telephone number is 571-272-4504. The examiner can normally be reached on Monday-Friday 9:00-3:30.
